## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-36 and 45-46 are drawn to a cosmetic or dermatological cleansing emulsion, classified in class 424, subclass 401.
  - II. Claim 37 is drawn to a foamed mousse, classified in class 53 subclass 470 and class 424, subclass 401 or 412.
  - III. Claim 38 is drawn to a compressed gas bottle, classified in class 215, subclass 260 and class 424, subclass 401 or 412.
  - IV. Claim 39 is drawn to an aerosol container, classified in class 424, subclass 401 or 412, and class 53 subclass 470.
  - V. Claims 40-42 are drawn to a bath, classified in class 424, subclass 401.
  - VI. Claim 43 is drawn to a face cleanser, classified in class 424, subclass 401.
  - VII. Claim 44 is drawn to a hair shampoo, classified in class 424, subclass 401.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I -VII are directed to related products. The related inventions are distinct if: (1) the inventions as claimed are either not capable of use together or can have a materially different design, mode of operation, function, or effect; (2) the inventions do not overlap in scope, i.e., are mutually exclusive; and (3) the inventions as

claimed are not obvious variants. See MPEP § 806.05(j). In the instant case, the inventions as claimed are drawn to materially different designs and mode of operation. For example, Invention I is drawn to a cleansing emulsion whereas Invention III is drawn to compressed gas bottle. The compressed gas bottle of Invention III has a totally different design than the cleansing emulsion composition of Invention I. Furthermore, the inventions as claimed do not encompass overlapping subject matter and there is nothing of record to show them to be obvious variants.

Inventions II-IV are directed to related methods of use. The related inventions are distinct if: (1) the inventions as claimed are either not capable of use together or can have a materially different design, mode of operation, function, or effect; (2) the inventions do not overlap in scope, i.e., are mutually exclusive; and (3) the inventions as claimed are not obvious variants. See MPEP § 806.05(j). In the instant case, the inventions as claimed do not overlap in scope because the methods of Inventions II-IV have materially different functions and effects. For example, Invention II is related to a method of alleviating pain, whereas Invention III is a method that can be used to treat depression. Alleviating pain is not required to treat a psychological condition such as depression and vice versa. Furthermore, the inventions as claimed do not encompass overlapping subject matter and there is nothing of record to show them to be obvious variants.

3. Restriction for examination purposes as indicated is proper because all these inventions listed in this action are independent or distinct for the reasons

given above and there would be a serious search and examination burden if restriction were not required because one or more of the following reasons apply:

(a) the inventions have acquired a separate status in the art in view of their different classification;

(b) the inventions have acquired a separate status in the art due to their recognized divergent subject matter;

(c) the inventions require a different field of search (for example, searching different classes/subclasses or electronic resources, or employing different search queries);

(d) the prior art applicable to one invention would not likely be applicable to another invention;

(e) the inventions are likely to raise different non-prior art issues under 35 U.S.C. 101 and/or 35 U.S.C. 112, first paragraph.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected invention.

If claims are added after the election, applicant must indicate which of these claims are readable upon the elected invention.

Should applicant traverse on the ground that the inventions are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
